Due date

Time (schedule)
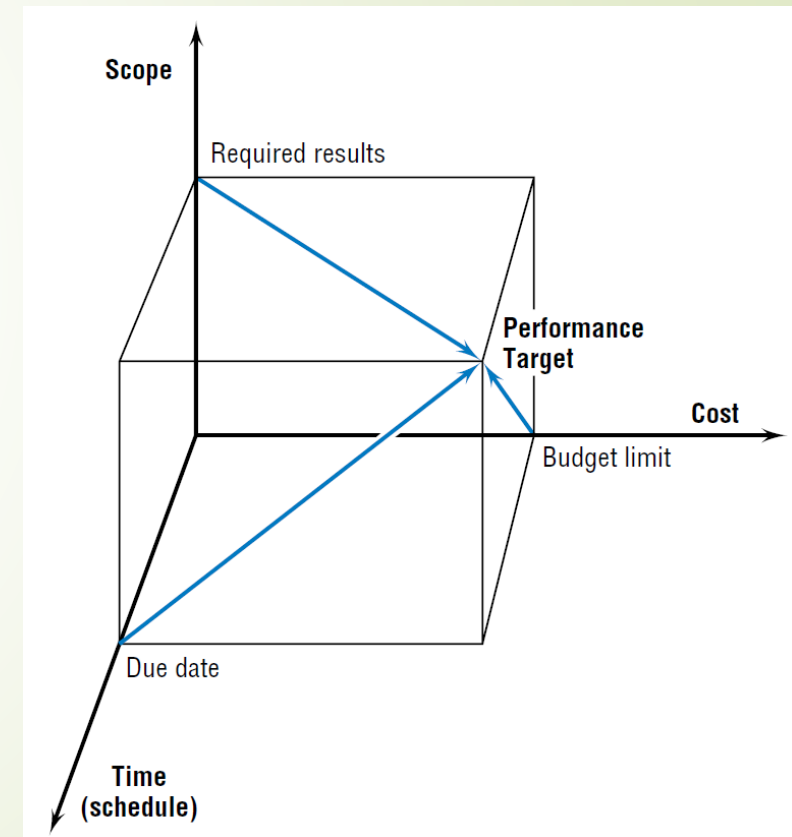

# Task 2

- The client originally thought that they'd be able to **supply content from their team**, including **SEO friendly product descriptions**. They've recently found out that their team doesn't have any available cycles to produce the content, and they've gotten in touch to **ask you about having your team do it**.
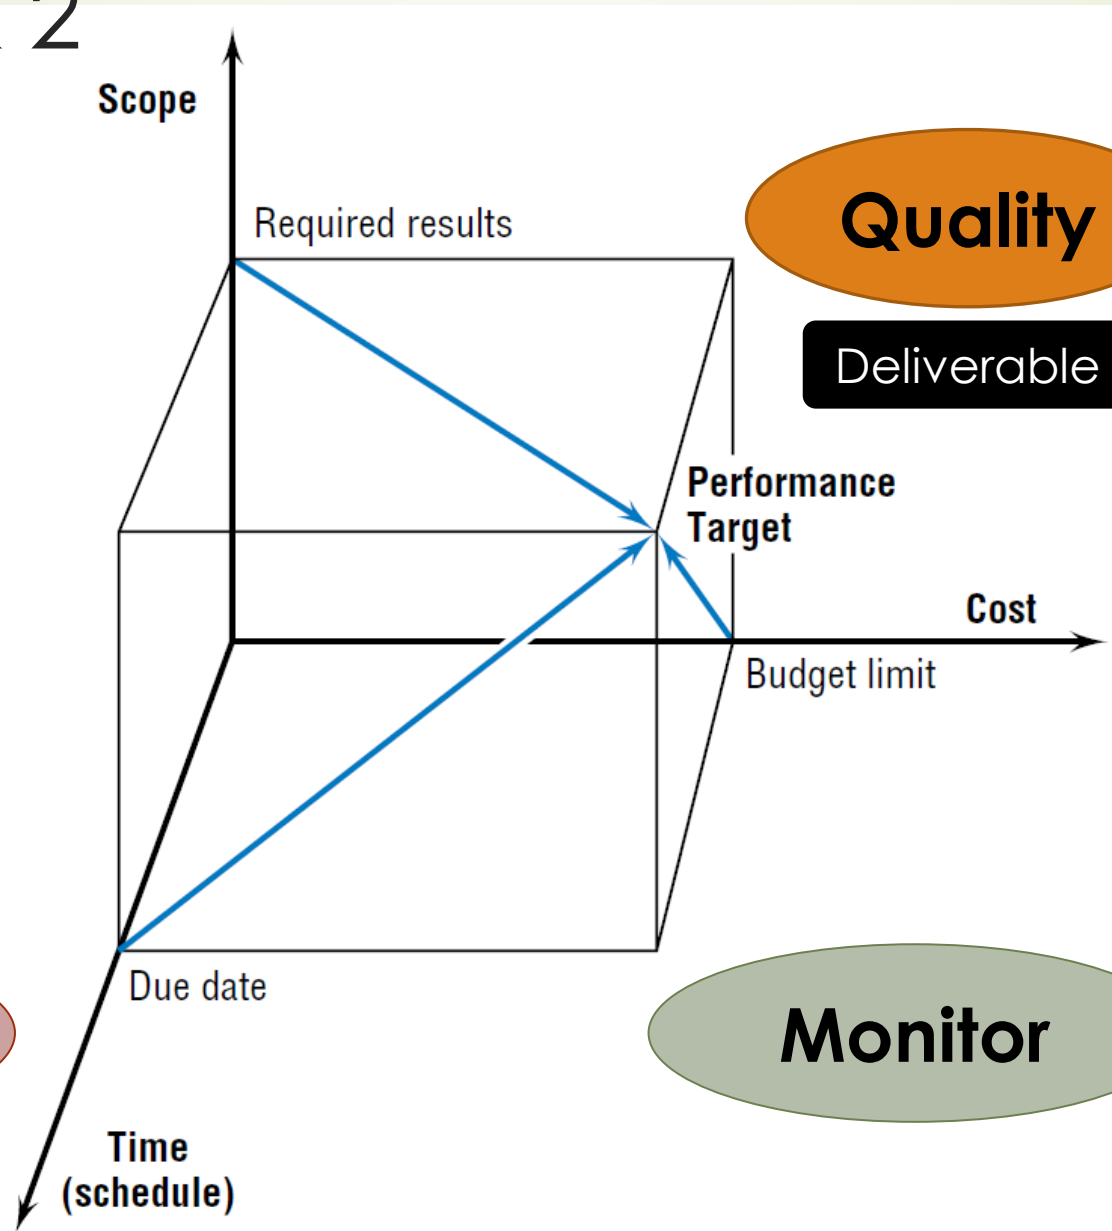

# Task 2

- Will you **agree to satisfy the client** and what aspects do you need to **think** of in this situation?

- How can the **triple constraints** help you to make convincing arguments with the client?

- What is the **biggest priority** in this project? Is it the cost, time, or scope?
